

Vijaita Ghosh

I'm a Product Designer with around two years of experience designing SaaS products, CRM systems, AI-powered platforms, and websites. I started my career in Journalism and Mass Communication, but found myself more drawn to solving problems through design. During my Mass Communication studies, I was introduced to marketing and basic design, that's where my interest in design really began. Journalism, on the other hand, taught me how to communicate and understand people, and today I get to solve those same problems visually. It's felt like a natural extension of where I started, not a departure from it. Since making the shift, I've worked across industries including insurance, recruitment, healthcare, construction, and EdTech, focused on creating intuitive, user-friendly experiences.

📁 [My Portfolio](#)

Core Skills

Design Tools: Figma (Advanced), Framer, FigJam, Miro, Adobe Photoshop, Maze

AI-Assisted Design: Claude, UX Pilot, Uizard, Relume, Vercel

UX/UI Skills: User Research, Visual Design, Wireframing, Prototyping, Information Architecture, Design Systems, Usability Testing, SaaS Platforms, CRM Systems, Front-End Design

Methods: Agile, Scrum, Cross-Functional Collaboration (Manager, Engineering & Marketing)

Work Experience

Bussin Design Studio, Remote – Product Designer 1

Sep 2025 – Present

- Designed website & distinct brand identities for CuriousPM and Sidekick while keeping both products aligned to one connected ecosystem, an AI-focused PM cohort program now serving 115+ PMs across 90 companies, ensuring guideline consistency across touchpoints.
- Designed the candidate experience for Smart Recruiter, an AI-powered hiring platform, structuring multi-stage AI-driven assessments and interview workflows into a single, intuitive journey from application through completion.
- Designed the website for TJB Group, a construction project-management consultancy, restructuring multi-stage service content (concept through handover) into a clear information architecture for prospective clients.
- Partnered closely with founders, managers, and engineers in Agile/Scrum sprints, gathering and refining requirements and communicating design specifications to ensure consistent execution across 4 concurrent products spanning AI, SaaS, and service-based platforms.

CreateXp Labs, Bengaluru – UI/UX Designer

Dec 2024 – Aug 2025

- Designed end-to-end UX for Qubit Insurance's broker CRM, used daily by 40+ agents across Montreal and Saint-Laurent teams, covering Clients, Policies, Claims, Notes, Tasks, and Files modules, working closely with stakeholders to align design with product goals.
- Built a role-based access framework and dashboards with payables overviews and activity logs, collaborating with developers to communicate design specifications and ensure consistent execution across 18 two-week Agile/Scrum sprints.
- Streamlined PDF generation flows for coverage, terms, and policy summaries, reducing manual document-prep time while maintaining alignment with engineering and business stakeholders.
- Led product design for Designing, an AI product built around purpose-driven AI Beings, shaping problem framing and homepage experience in close partnership with product and engineering teams.
- Redesigned the website for Ridgeway Construction, a construction and re-modeling company, reorganizing the information architecture and visual identity to modernize the brand and strengthen lead generation.

Freelancer – UI/UX Designer

Jul 2024 – Dec 2024

- Designed an end-to-end web application for 72Hrs Smile, a multi-doctor dental clinic, covering patient registration, appointment booking, and visit-history tracking.
- Built role-specific dashboards and daily activity logs for admin and clinical staff, simplifying day-to-day operational coordination across the clinic's doctor team.
- Designed doctor-profile, availability, and case-record interfaces to help staff coordinate scheduling and operational workflows across the clinic.

Accenture – Business Delivery Process Associate

Jul 2021 – Dec 2021

- Reviewed and moderated high-volume user-generated content to ensure compliance with community standards and platform policies.
- Collaborated with global cross-functional teams to maintain content quality, platform safety, and policy consistency across regions.

Education

Dice Academy, Graphic & UI/UX Design | 2023–2024

Digital Academy 360, Digital Marketing | 2020–2021

Dayanand Sagar University, Journalism & Mass Communication | 2016–2019

License & Certifications

IBM, Coursera – Generative AI for UI/UX Design | 2026
